RESEARCH INTERESTS

I am interested in applied and computational mathematics in general, with a particular focus on developing efficient numerical algorithms for modeling and simulating complex systems. Specifically, I am engaged in research on fast summation algorithms tailored for long-range interactions. I have also concentrated on algorithms for combinatorial optimization problems.

EDUCATION

Hong Kong University of Science and Technology, Hong Kong SAR, China

2021 -- now

P.h.D. Majoring in Applied Mathematics, supervised by [Prof. Zecheng Gan](#)

The University of Science and Technology of China, China

2017 -- 2021

B.S. Majoring in Applied Physics

PRESENTATIONS AND POSTERS

SciCADE 2024, Contributed Talk

July 15-19, 2024

Fast Algorithm for Quasi-2D Coulomb Systems

ICIAM 2023, Poster

August 20-25, 2023

Random Batch Quasi-Ewald Method for the Simulations of Charged Particles under Dielectric Confinement

SKILLS

Programming Languages: Julia (proficient), Python, C/C++

Languages: Mandarin Chinese (native), English (proficient)
